## St. Charles Borromeo Catholic Church

The sanctuary window consisted of 15 separate units that were milled in the field to fill the impressive 8 foot by 21 opening.

With a beautiful, warm, rich feeling of wood on the interior and an extruded aluminum cladding on the exterior, Marvin Clad-Wood windows were the perfect fit for this project.

The wood interior offers natural insulating properties that help increase the thermal performance. Combined with a high performance Low E coating, these clad-wood windows meet Energy Star, which will reduce the cost of heating and cooling.

The 70% Kynar Finish, which exceeds the AAMA2605 Finish Specification, the highest in the industry, will help keep the windows looking like new for years to come.
